

INNOVATIVE AND SUSTAINABLE AVIATION FUEL SOLUTIONS

WWW.IFUEL.AERO

iFuel AG Switzerland is an aviation service provider, and we believe in technologically innovative and environmentally conscious fuel solutions for your aircraft.

Our mission is to provide our customers, including members, clients, and their staff with efficient and competent service, support, and facilitation. We want to save your time and money, so let us worry about refueling your aircraft for you.

No matter what your request is, iFuel promises to approach your problem with a personalized solution that would fit specifically your scenario and specifically your budget.

FUEL SOLUTIONS

COMMERCIAL

Commercial aircraft refueling may turn out to be less systematic than what you've planned for. A charter might need a quick turnaround, but you haven't planned for its refueling in advance. iFuel got that covered. We will make sure jet fuel is ready and on standby wherever and whenever you need it.

MILITARY

iFuel focuses strongly on providing worldwide assistance and being the only middleman in the transactions between our clients and the supplier. Because of this, our services can be easily personalized at any location to suit even military aircrafts' demands.

SUSTAINABLE

Our close relationship with many forward-thinking key suppliers enables us to introduce new sustainable aviation fuel to our customers. We must work together to implement innovative ecological travel solutions and reduce our carbon footprint, and iFuel is ready to help with this.

BUSINESS

We work with over 170 aviation fuel suppliers all over the world, providing you with efficient and effective aircraft refueling solutions that were personalized and selected to fit your specific requests.

CARGO

We work with a great variety of suppliers through which we can find the right solution for any problem your cargo aircraft must face and come up with the best deal for you.

GLOBAL SUPPORT

Our team will provide you with aircraft refueling and trip support wherever you might need it. iFuel works with quite an extensive network of suppliers all around the globe which enables you to access our services virtually anywhere.

24/7 SERVICES

Whether you have a question in the middle of the night, or you seek immediate assistance, we are here for you. The iFuel team works 24/7 to make sure you receive an efficient response and a correspondingly efficient service.

RELIABLE CREDITING SYSTEM

We believe you should not overpay for jet and sustainable aviation fuel, and iFuel's crediting system allows you to do so. There will be no third-party brokers involved in our client/supplier transactions, so we can keep our rates as transparent and low as they are to save you money.
